

SMARTIE

A Smarter Way of Building Intelligent AI Bots

<https://smartie-ai.web.app/>

Universal Layer

Universal Bot definition is most innovative of storing a bot definition. Conversion Api can convert this universal bot definition to any of the bot services on a single click.

<https://smartie-ai.web.app/>

Components

- ML - Recommendation Engine
- RL - Enhance User experience and interactions
- FAQ - Easily Built FAQ engine for answering FAQs
- OCR - Extract text from PDF/Image.
- NLP - Advance NLP features.
 - Bert - Summerization
 - Bert - Wiki bot
- Chat-Ops
- ExtractFromDocument - OCR
- FAQengine
- recommendation engine
- Smartie ConversationFramework
- TextSummarization

Our Motivation.

Intelligent Bots **with AI**

Strong & Advance
Language Model AI Bots

Powered by Advance AI/NLP

We use most advance and reliable azure services for
building AI assistant.

ML - Machine Learning

■ Affordable AI

■ metaverse

Recommendation Engine

Capable of recommending best products to user

■ High Performance

Configurable Engine

Easily configure so the our model can recommend and learn about new products

■ Innovatife & Creative

Low Shot Learning

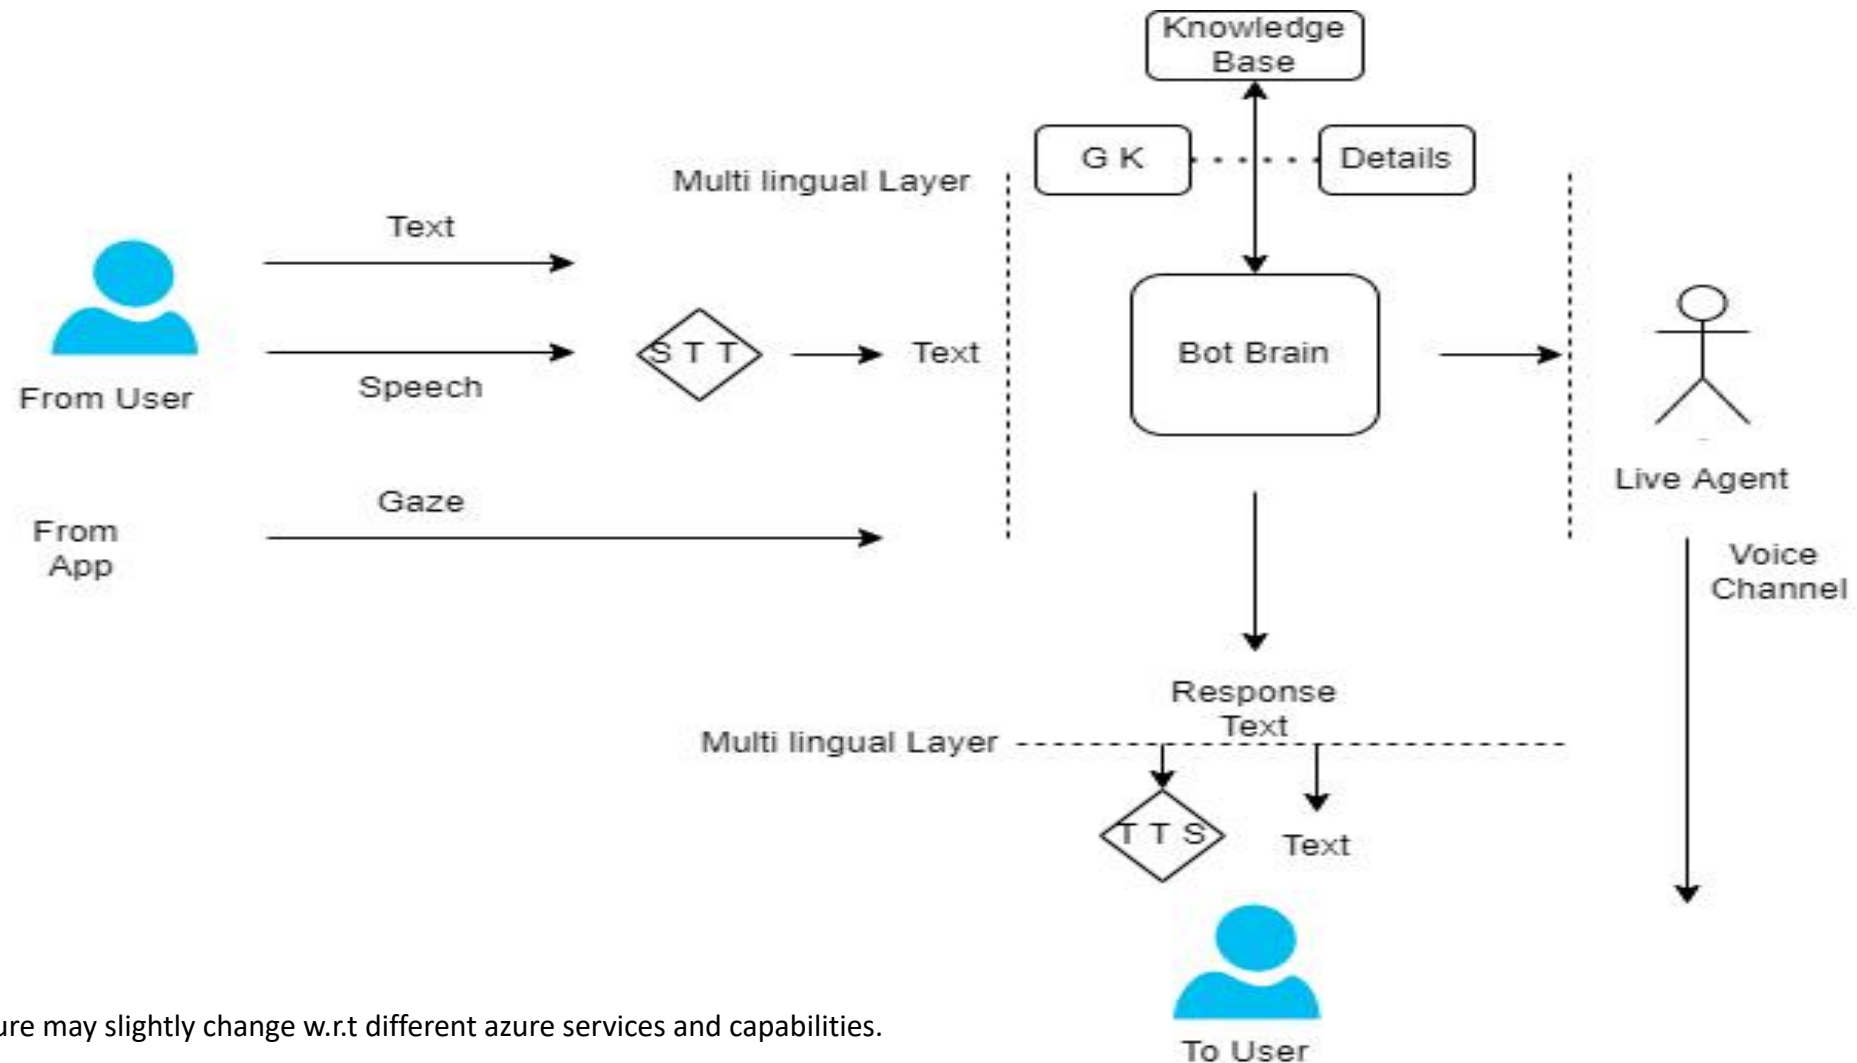

With out Low Shot learning our ML models works efficiently with low data.

■ Give Smart Solution

ARIA AI Bot

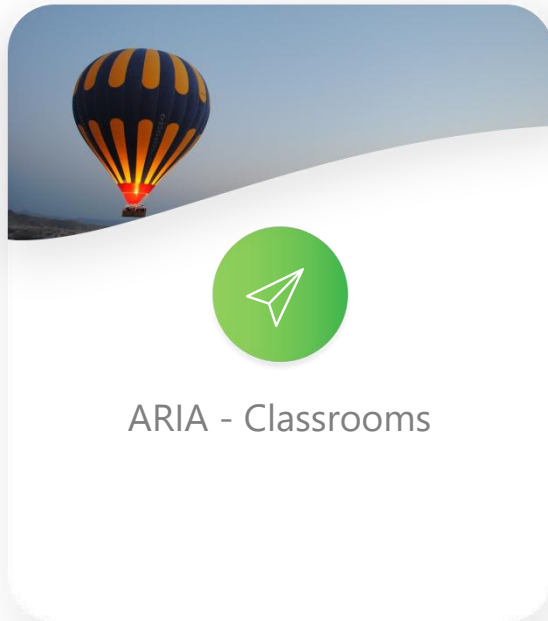

ARIA Bot

Most advance AI Voice / Chat Bot powered by AI

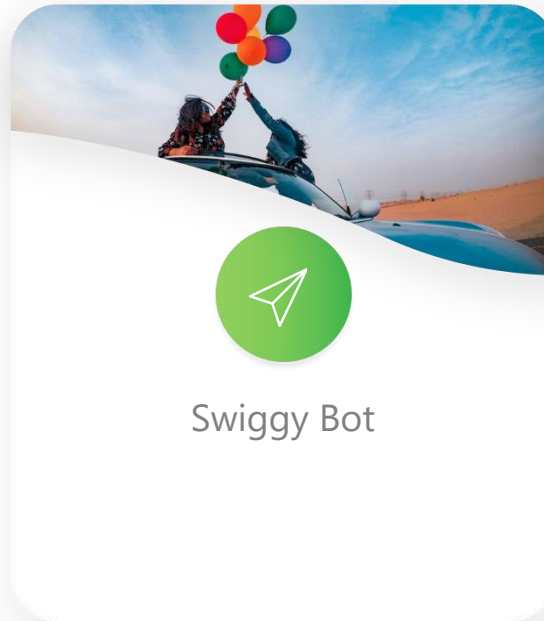

Note: Actual architecture may slightly change w.r.t different azure services and capabilities.

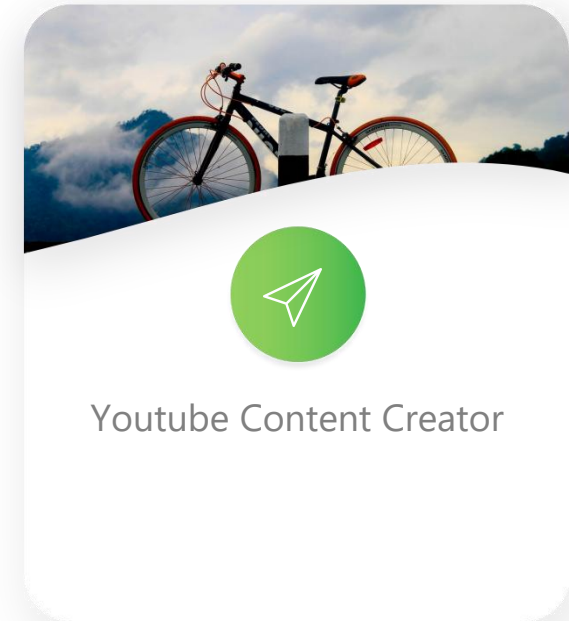

UseCases.

■ Highly innovative

■ Innovatife & Improvise
Banking

■ Health Care Innovation

Capabilities

Students

Can learn more effectively

Guided Virtual Tours, Collaborative Tours (ARIA together)

Employees

Can learn very fast

HR policies, Office Walkthroughs etc

Internet User

Enriched Understanding

Any information in internet can be consumed more effectively

Metaverse User

ARIA Study, ARIA Narration

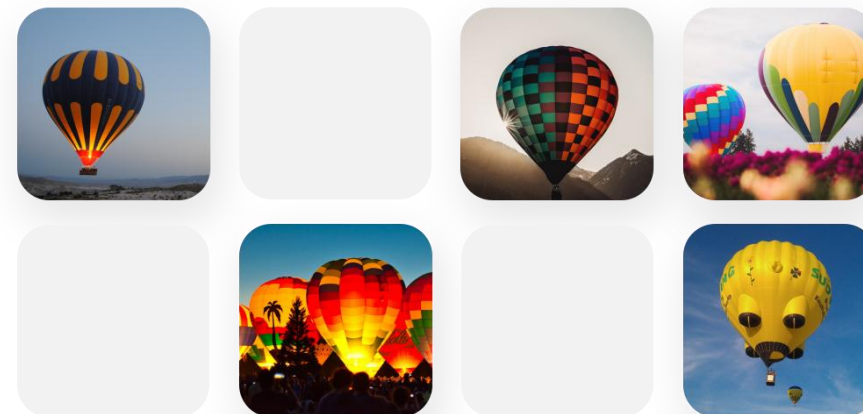

Schools, Students, Personalization

About Us.

Team

Transform Learning/business
with AI.

- ✓ Passionate Team
- ✓ Experienced developers
- ✓ Built with open source
